INDEX TO VOLUME XXIX.

A

Action, A Ridiculous, 254.
Admiralty Gunmetal, 12.
Alloys, Determination of the Thermal-Coefficients of Expansion of some Chemical Metals and, 244.
Alloys, Discussion on Dr. Barclay's Paper on the Practical Value of Modern Non-Ferrous, 178.
Alloys which Expand on Solidification, Copper-Zinc, 421.
Aluminium-Alloy Pistons, 420.
Aluminium Alloys, Note on the Difficulties of Casting, 167.
Aluminium and its Alloys, Use of Fluxes in the Melting of, 427.
Aluminium at High Temperatures, Tensile Properties of, 276.
American Exchange Paper, 322.
American Steel Castings, Manufacture of, 399.
Automobile Foundry Practice, Modern, 158, 169, 191, 207, 215, 235.
Axle Box, New British Standard, 88.

B

Basic and Acid Steels, Comparative Investigation of, 200.
British Cast-Iron Research Association, 79, 248, 536.
British Chemical Standards, 104.
British Empire Exhibition, 258.
British Industrial "Safety-First" Association, 276.
British Pig-Iron and Steel Output, 63.
British Standard Specifications, 146.
Brittleness in Malleable Cast Iron, 84.
Brittle Ranges in Brass as Shown by the Izod Impact Tests, 234.

C

Canadian Iron and Steel in February, 322.
Canadian Mineral Production in 1923, 87.
Cardiff, Proposed I.B.F. Branch in, 84.
Castings, Liquid Steel for, 238.
Castings, Liquid Steel for Light, 367.
Castings, Manufacture of American Steel, 399.
Cast Iron, Brittleless in Malleable, 84.
Cast Iron, Reinforced, 117.
Cast Irons, High Temperature Growth of Special, 375.
Cast Iron, Some Experiments on, 252.
Cast Iron, Titanium in, 374.
Chaplets in Brass Castings, 135.
Chemical Aspects of Welding, 157.
Cobalt, Metallurgical Uses for, 63.
Copper, Relation between the Tensile Strength and the Electrical Restivity of Commercially Pure, 234.
Copper-Zinc Alloys which Expand on Solidification, 421.

Correspondence:—

Action of Molten Brass on Nickel Steel, 104, 124.
American Specifications for Steel Castings, 536.
An Appreciation, 63.
Briquetting of Cast-Iron Borings, 2.
British Cast-Iron Research Association, 206.
British Industries Fair at Wembley, 212.
Cost of Castings, 3.
Decline of Semi-Steel, 26.
Draughtsmen and the Foundry, 166.
Economy in Cupola Practice, 352.
First Cost, Best Cost, 116.
Institute of British Foundrymen: Status of Membership, 532.
John Surtees' Memorial Medal, 248.
Low Temperature Reduction of Iron Ore, 422, 438.
Manufacture of Pearlitic Cast Iron for High-Temperature Engines, 451.
Name Confusion, 547.
Newcastle Junior Section, 166.
New Era in Foundry Research, 268.
New Grinding and Fettling Regulations, 199.
Photographs Taken at the Newcastle Conference, 532.
Professor Campion's Paper on "Semi-Steel," 332.
Recruiting Foundry Apprentices, 124, 146.
Reinforced Cast Iron, 162.
Sand and Coke, 394.
Semi-Steel for Locomotive Cylinders, 380.
Silicon in Centrifugal Castings, 454.
Trade in Russia, 82.
Transverse Test Bars in India, 2.

Corrugated Steel Fasteners, 138.
Cylinders, Motor Cycle, 311.
Cylinder Stuffing Box, Moulding a L.P., 211.

D

Death of a Prominent Tyneside Foundryman, 84.
Death of a Prominent Foundryman, 331.
Defective Castings: Causes and Remedies, 125.
Desulphurising Coke with Steam, 524.
Discussion on Dr. Barclay's Paper on the Practical Value of Modern Non-Ferrous Alloys, 178.

E

Effect of Ingot Moulds on Steel, 274.
Electric Furnace as Influenced by Self-Baking Electrodes, Future of the, 57.
Electric Furnace Developments, 273.
Electric Furnace Refractories, 188
Electric Furnaces, 322.
Electricity in the Foundry, 135.
Empire Mining and Metallurgical Congress, 80.
Engineering Formulæ, Transverse Test-Bars and, 378, 436.
Engineers, Junior Institution of, 382.
Exhibition, International Foundry Trades, 502, 525 537.
Expansion Bit, Simple, 514.
Experiments on Cast Iron, Some, 252.

F

Fasteners, Corrugated Steel, 138.
Fluxes and Slags in Metal Melting and Working, 343, 359, 388.
Fluxes and Slags in Welding, 414.
Fluxes in the Melting of Aluminium and its Alloys, Use of, 427.
Foundry, Electricity in the, 135.
Foundry Materials, Rough Tests of, 53.
Foundry of the Sunbeam Motor Car Company, 455.
Foundry Practice, Improvements in, 37.
Foundry Practice, Modern Automobile, 158, 169, 191, 207, 215, 235.

Foundry Queries:—

Alloy Casting, 167, 218.
Casting Copper in "Green Sand," 416.
Centrifugally Cast Bearings, 454.
Coke Consumption and Lining Thickness, 344, 405.
Cold Metal, 394, 416, 437.
Core Drying Stoves, 405.
Core Ramming Machines, 228, 268.
Cupola Tuyeres, 344.
Facing Sand for Ornamental Castings, 3, 26.
Heat-Resisting Irons, 344, 382.
Locomotive Cylinder Mixtures, 228, 268, 308, 332
Locomotive Cylinders, 394.
Oil Sand Cores, 167, 218.
Pneumatic Chippers for Fettling, 140.
Porous Gunmetal, 374.
Porous Gunmetal Castings, 394.
Sand and Coke, 308, 332, 374.
Sand Quantities and Coke Ratio, 437
Tuyere Areas, 268.
Ventilating Oil Stoves, 332.

Foundry Trades' Exhibition, International, 502, 525, 537.
Furnace End-Moll Design of Open-Hearth, 275.
Furnaces, Electric, 322.
Furnaces, Pulverised Coal in Open-Hearth, 69.
Future of the Electric Furnace as Influenced by Self-Baking Electrodes, 57.

G

Gas-Measurement of Power, 105.
German Foundrymen's Association Annual Report, 98
German Pig-Iron Union, 42.
Grinding of Metals, 144.
Gunmetal, Admiralty, 12.

H

Hardness Testing Apparatus for Moulds and Cores, 50.
Heat Treatment of Semi-Steel, 364.
High-Temperature Growth of Special Cast Irons, 375.
Hot Working of Steel, 87.

I

Improvements in Foundry Practice, 37.
Ingot Moulds on Steel, Effect of, 274.

Institute of British Foundrymen.

Annual Conference.

Annual Meeting, 474, 509.
Discussion on Conference Paper, 548.
Economical Melting with Cupolas, 543.
Formation of Graphite in Cast Iron, 515.
Production of Castings in Permanent Moulds, 464, 477.
Non-ferrous Alloys in Marine Engineering, 486.
Technical Side of Oil-Sand Cores, 543.

Birmingham Branch.

Annual Meeting, 387.
Cylinder Problem, 147, 173, 195.
Discussion on Mr. E. Longden's Paper on The Relative Value of Feeders and Denseners in Grey-Iron and Malleable Iron, 48.

INDEX TO VOLUME XXIX.

A

Action, A Ridiculous, 254.
Admiralty Gunmetal, 12.
Alloys, Determination of the Thermal-Coefficients of Expansion of some Chemical Metals and, 244.
Alloys, Discussion on Dr. Barclay's Paper on the Practical Value of Modern Non-Ferrous, 178.
Alloys which Expand on Solidification, Copper-Zinc, 421.
Aluminium-Alloy Pistons, 420.
Aluminium Alloys, Note on the Difficulties of Casting, 167.
Aluminium and its Alloys, Use of Fluxes in the Melting of, 427.
Aluminium at High Temperatures, Tensile Properties of, 276.
American Exchange Paper, 322.
American Steel Castings, Manufacture of, 399.
Automobile Foundry Practice, Modern, 158, 169, 191, 207, 215, 235.
Axle Box, New British Standard, 88.

B

Basic and Acid Steels, Comparative Investigation of, 200.
British Cast-Iron Research Association, 79, 248, 536.
British Chemical Standards, 104.
British Empire Exhibition, 258.

Hot Working of Steel, 87.

I

Improvements in Foundry Practice, 37.
Ingot Moulds on Steel, Effect of, 274.

Institute of British Foundrymen.

Annual Conference.

Annual Meeting, 474, 509.
Discussion on Conference Paper, 548.
Economical Melting with Cupolas, 543.
Formation of Graphite in Cast Iron, 515.
Production of Castings in Permanent Moulds, 464, 477.
Non-ferrous Alloys in Marine Engineering, 486.
Technical Side of Oil-Sand Cores, 543.

Birmingham Branch.

Annual Meeting, 387.
Cylinder Problem, 147, 173, 195.
Discussion on Mr. E. Longden's Paper on The Relative Value of Feeders and Denseners in Grey-Iron and Malleable Iron, 48.

670.5

Discussion on Mr. Field's Paper on "Pig-Iron: Its Characteristics and Uses," 409.
On the Working Slags in Ferrous Processes, 395, 429.
Pattern Shop Talk, 229.
Pig-Iron: Its Characteristics and Uses, 353.
Relative Values of Feeders or Denseners in Grey-Iron and Malleable Iron, 29.
Some Necessary Adjustments between the Foundry and Drawing Office, 180.

Burnley Section.

Annual General Meeting, 385.
Dry Sand and Loam Moulding, 341, 417.
History of the Manufacture of Cast Iron, 153.
Tea and Whist Drive, 138.

Coventry Branch.

Cylinder Problem, 147, 173, 195, 241.
Discussion on Mr. Cole Estep's Paper on "Quantity Production in American Foundries," 38.
Discussion on Mr. Currie's Paper on "The Preparation and Testing of Moulding and Core Sands," 16.
Discussion on Mr. Dick's Paper on "A Pattern-Shop Talk," 304.
Discussion on Mr. Shaw's Paper on "Physical Tests for Cast Iron," 323.
Draughtsmen and the Foundry, 132.
Influence of Composition and Rate of Cooling upon the Microstructure and Physical Properties of Cast Iron, 333, 365.
Physical Tests for Cast Iron, 226, 262.

East Midlands Branch.

Annual Meeting, 304.
Discussion on Mr. Field's Paper, 423.
Hints on Green-Sand Moulding, 297.
Oil-Sand Cores, 198.
Pig-Iron: Its Characteristics and Uses, 353, 409.

Lancashire Branch.

Annual General Meeting, 366.
Jolt-Ramming Moulding Practice, 249.
Non-Magnetic Cast Iron, 439.
Practical Value of Modern Non-Ferrous Alloys, 85.
Some Foundry Reminiscences, 136.
Visit to Textile Machinery Works, 438.

London Branch.

Annual General Meeting, 449.
Day at the Cupola, 89.
Discussion on Cupola Practice, 34.
Discussion on Mr. Bartlett's Paper, "A Day at the Cupola," 113.
Discussion on Mr. Gardom's Paper on Malleable Iron Chain, 301.
Foundry Cupola and Mechanical Charging, 18.
Malleable Iron Chain, 269.
Manufacture of Pearlitic Cast Iron for High-Temperature Engines, 406.
Moulding Sands for Steel Castings, 445, 460.
Some Foundry Problems, 58.
Visit to Chain Factory, 449.

Newcastle Branch.

Apprenticeship and the Foundry Trades, 383.
Cupola Furnace, 343.
Green-Sand Moulding, 54, 254.
Operation of a Brass Foundry under Scientific Control, 291.

Scottish Branch.

Annual Dinner, 68.
Annual Meeting, 319.
Co-operation for the Production of Castings, 219.
Some Problems in Light Castings, 299.

Sheffield Branch.

Annual Dinner, 152.
Cylinder Problem, 147, 173, 195, 241.
Discussion on Mr. F. H. Hurren's Paper on "The Influence of Casting Temperature of Aluminium Alloys, 96.
Discussion on Mr. Harley's Paper on "Metallurgical Control in Automobile Foundry Practice," 283.
Influence of Casting Temperature of Aluminium Alloys, 75.
Moulding Sands for Steel Castings, 445, 460.
Oil-Sand Cores, 198.
Relative Values of Feeders and Denseners for Steel, 118.
Relative Values of Feeders or Denseners in Grey Iron and Malleable Iron, 29.
Relative Values of Feeding Heads or Denseners for Grey Iron and Malleable, 118.

South Wales and Monmouth Branch.

Cardiff Propaganda Meeting, 110, 167.
Meeting, 228.

West Riding of Yorkshire Branch.

Elimination of Structural Weaknesses in Castings, 5.
Handling of Foundry Materials, 137.
Should Pig-iron be Bought by Fracture or Analysis?, 259.

Institute of Metals, 104, 145, 213, 374.
